

Preparing for your video biography

Date of appointment: _____

If you cannot keep this appointment, please call the number at the bottom of this page.

Here are some ideas on how you can prepare for the video biography interview:

- Read the interview questions and cross out the ones that you do not apply to your life or that you do not want me to ask and add any questions that you do want me to ask. Remember, there should be no more than 10 questions.
- Gather together 15 to 20 photos. These photos will be recorded on location; no photos will leave your house.
- Prepare a location in your house for the interview, some place comfortable and quiet, with enough room for my camera and lighting equipment.
- The interview will take about 40 minutes to ask the questions and record all the photos.
- Once the interview is done, it takes about two weeks to get the final copy of the video biography.
